

Teleconference

Conference calls for users worldwide

This service is a valued, price and time efficient alternative to standard meetings. Creating a conference is very easy. It is simply a matter of dialing the number assigned by Dial Telecom once the service is activated and entering the relevant authorization code; you and all other invited users can then begin communicating with each other.

WHO IS THE SERVICE DESIGNED FOR?

The TELECONFERENCE service is designed primarily for large and medium large companies who need flexible communication with their local as well as international branches, customers or partners.

GUIDELINES FOR ACTIVATING TELECONFERENCE

- send the assigned telephone number and the PIN code to all invited users
- dial the defined number at the chosen time
- after the introductory announcement, enter the PIN code
- if you are first at the teleconference, you will hear music
- each user is announced with a beep

BENEFITS OF THE SERVICE

- worldwide availability 24/7
- zero costs for travel and lodging
- requires only a telephone with tone dialing connected to the public telephone network or a mobile phone
- a reliable and professional solution
- 24/7 monitoring

TELECONFERENCE enables meetings with users worldwide through calling, eliminating lost time and costs for travel and lodging.
